Model NPG-HPS20BC		

***Power:** The rated power of your generator will vary slightly depending on your choice of fuel: liquid propane (LP) or natural gas (NG).

****Sound:** When comparing sound ratings, be sure that you are comparing equivalent methods of measurement. Sommers' sound levels are measured with the system running **on full load**, from a distance of 22'10" (7 m).

Protect the comfort of your home with the personal touch from Sommers

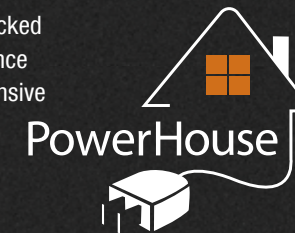

- Expert onsite service and life-long support in your neighbourhood
- 4 models right-sized for your home and lifestyle
- Popular options for lasting value and easy control

Count on Canada's *Power House* in generator systems

Sommers has been a trusted name in generating, delivering and applying electrical power for over 75 years.

Generator systems are our only business and, today, Sommers is the leading Canadian manufacturer of packaged generator systems. Along with the Sommers Home Series generators, Sommers offers a complete range of customized standby, PTO and off-grid generator power solutions.

As a generator specialist backed by proven technical experience and the country's most extensive aftermarket service and parts facilities, Sommers is the "power house" to depend on in Canada.

For professional service, depend on the authorized Sommers Generator Systems specialist in your area.

Power with a personal touch

Standby Generator Systems
 For Your Home

A personal choice for you and your family

Introducing a new series of efficient, affordable generator systems designed for homeowners, and backed by Canada's most respected name in standby power.

"Right-size" and save

Count on your Sommers service expert to help you choose the generator size that suits your power needs and your budget.

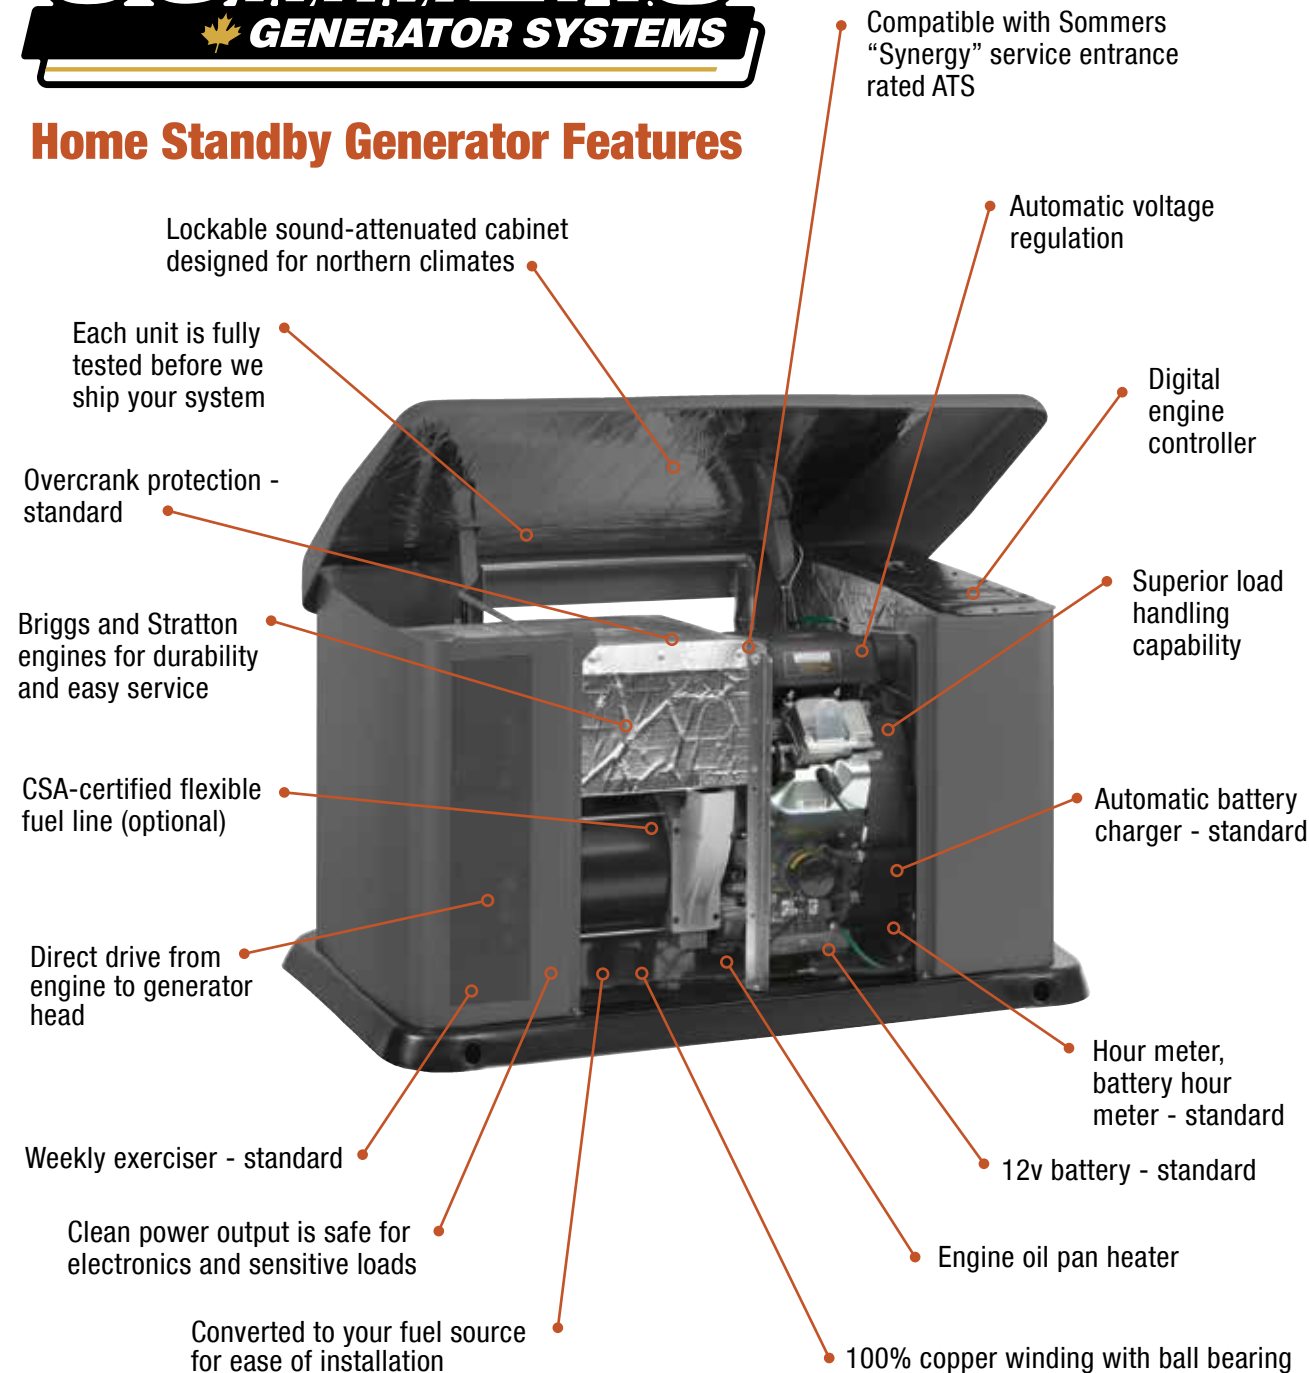

Get the right people, and be sure

Generators are all we do! Nobody knows more about how you can get the best value for your standby power investment.

Our lifelong commitment to your home is shown in our over 75-year long record for outstanding customer service, season after season.

Home Standby Generator Features

Extra Touches From Sommers

Synergy ATS

Developed by Sommers, the first service-entrance rated transfer switch, can save hours of installation time; eliminate difficult indoor routing of wiring and controls.

Battery, Charger & Cold Weather Kit

Others charge extra for assured, smooth start-ups, but it's factory standard at Sommers.

Sentinel Remote Monitoring

Access the status and control of your generator with your smartphone or computer; receive automatic notification when the generator starts up or requires service.

Power Manager

Smart automatic controls balance the power output to support selected circuits or the whole house with a smaller, more efficient standby system.

Touch Control

Set-up and monitor your system with familiar, intuitive touch-screen controls.

Planned Service

Sommers' optional service packages of monthly monitoring or onsite service agreement ensure thorough inspections and maintenance of your complete system by fully qualified generator technicians.
